Providence, RI 02903

**Re: Development of Waste Transfer Station in Pawtucket**

Dear Mayor Elorza:

I have been a proud resident of the City of Providence for over \_\_\_\_ years.

Recently, I learned through media reports that a waste transfer station is in the process of being developed in my neighborhood. The proposed site is 55 Concord Street, Pawtucket, Rhode Island, which is right over the Providence border and less than \_\_\_\_ mile(s) from my home.

This waste transfer station deeply disturbs me. I am concerned about the negative effects it will have on me, my family, and the overall quality of life in my neighborhood.

I invite you to investigate the current waste transfer station located at 240 Grotto Avenue and its history of violations with DEM, soil contamination, air quality depreciation, rat infestation, building violations, etc. I ask that you support the residents of Providence who are working to oppose the relocation of the transfer station to the Concord Street site.

As an elected leader charged with protecting the welfare of constituents, we appreciate your support and effort in stopping this plan from going forward.

Sincerely,
